DETAILED ACTION

1. This communication is in response to amendment filed 11/30/2006 and subsequent Terminal Disclaimer filed on 6/1/07.

Response to Amendment

2. Claims 26, 44 and 52 have been amended per request. Claims 26, 28-33, 43-64 are currently pending and have been allowed.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:

The claimed inventions pertain to restricting payment accounts corresponding to a user.

The claims are allowed because prior art of record individually or in combination fails to teach restricting payment accounts using the following process.

A plurality of payment accounts are maintained on a server in a user specific electronic wallet that a user can access for a purchase from a merchant. Each payment account contains an identified associated external account where the funds available to the user are maintained. The funds in the external accounts identified by the payment accounts are restricted for spending

Art Unit: 3693

at a merchant. When the user makes a purchase, a request for purchase is received at the (wallet containing) server from a merchant server. A set of payment accounts in the electronic wallet which are not restricted for spending at the merchant is determined based upon identity of the merchant server and a display that identifies the set of payment accounts is generated.

The following prior art references have been deemed most relevant to the allowed claim(s):

U.S. Patent No. 6,611,819 to Oneda are directed to an electronic money system in which electronic funds stored on an IC card are used as settlement, means in lieu of bills and coins. A carriable IC card stores a general and specific electronic money balances. General balances may be freely spent without use limits. Specific balances have an associated limited use range. Oneda col. 1, lines 54-40. A wallet device receives a transferor IC card and a transferee IC card to affect actual transfer of funds (electronic money) from the transferor to the transferee. The transferor may specify genre use limits for electronic money transferred to the transferee. Oneda Col. 7, line 34-40. The electronic money is maintained on the IC card, and is listed directly to purchase items. When IC Card is used to purchase items, a settlement unit retrieves from a POS server genre information regarding items to be purchased. A comparison is made between genre information regarding items to be purchased, with genre use limits or available genres maintained on the IC card with the settlement funds. If the genre of the items to be purchased coincides with the available genre, payment is allowed and payment is deducted from the electronic money balance of the card. If the genre is not available, payment is denied. Oneda, Col 8, line 4-21. Thus, Oneda describes a system in which genre use limits are specified for on electronic money maintained on an IC card.

However, Oneida fails to teach at least determining a set of payment accounts in an electronic purse maintained in a server not restricted for spending based upon the identity of the merchant as stated in the presently allowed claims.
